Customizable Modules

This unit is equipped with modular sensors which can be custom-made to fit your project's monitoring needs:

and more!

Secure, Flexible, Connected

Wi-Fi

Using end-to-end SSL/TLS encryption, this unit provides maximum security for data transfer.

Ethernet

This unit supports Wi-Fi and ethernet for connectivity, as well as various network configurations, including company proxy servers, hidden SSIDs, and captive portals. Both Static IP and DHCP options are available.

Simple Installation

The unit is easily mounted onto any wall with just three screws. Power on and access your air quality data within minutes.
